

# Shanal (Dre) Mahaarachchi

drehanm.github.io  
drehanmaha@berkeley.edu | 805.444.8740

## OVERVIEW

An ambitious student-turned-full-stack-developer eager to learn about and implement new front end and back end technologies. Interested and adept in integrating data visualization with the user experience.

## EDUCATION

### UNIVERSITY OF CALIFORNIA, BERKELEY

ELECTRICAL ENGINEERING AND  
COMPUTER SCIENCE – BS

Expected May 2020

Major GPA: 3.61 / 4.00

Cum. GPA: 3.56 / 4.00

## LINKS

 My Website

 DrehanM

 Dre Mahaarachchi

## COURSEWORK

### UNDERGRADUATE

Algorithms & Intractable Problems

Database Systems

Data Structures

Intro to Computer Architecture

Structure of Computer Programs

Circuits & Applied Linear Algebra

Discrete Math & Probability

Multi-Variable Calculus

Single-Variable Calculus

Physics: Mechanics

## SKILLS

### LANGUAGES

Python • Java • C/C++

Javascript • HTML/CSS •  $\LaTeX$

MySQL • Shell • Assembly

### FRAMEWORKS & TOOLS

Pandas • Numpy • Scipy

React • Django • PyQt

Git • AWS • Excel

## COMMUNITY

### ORGANIZATIONS

iSTEM Without Borders • Director

Chi Psi Fraternity • Scholarship Chair

### SERVICES

Volunteer Tutor for Computer Science

## EXPERIENCE

### JET PROPULSION LAB – NASA

PASADENA, CA

SOFTWARE ENGINEERING INTERN

JUNE 2018 – AUG 2018

- Worked closely with distinguished researchers in Infrared Photonics Group to improve analytics procedures for infrared detector analysis.
- Designed and implemented IRIS, an interactive analytics app that drastically decreased turnaround for detector analysis.

### RHEW RESEARCH LAB – UC BERKELEY

BERKELEY, CA

ENGINEERING APPRENTICE

DEC 2017 – PRESENT

- Developing an interactive data analytics application to view climate data harvested from Sagehen Field Station.
- Developing scripts to automate and augment laboratory processes.
- Integrating lab resources through GitHub and Slack.

### EECS – UC BERKELEY

BERKELEY, CA

LAB TEACHING ASSISTANT

DEC 2017 – PRESENT

- Administering lab sections of 30+ students for an undergraduate electrical engineering course.
- Assisting students with EE fundamentals, including but not limited to: Circuit Analysis, Signals, Controls, PCA, SVD, DFT.

### COMNETS – UNIVERSITÄT BREMEN

BREMEN, GERMANY

SOFTWARE ENGINEERING INTERN

MAY 2017 – JULY 2017

- Designed and implemented ROM, an IoT sensing module that can detect the number of people in a room and remotely report the data to a server.
- Experimented with various sensing technologies and network architectures.

## SELECTED PROJECTS

### IRIS | PYTHON

Short for Infrared Informatics Software, IRIS is an interactive graphing utility that processes and displays IV data for infrared photodetectors.

### TIMESHEET | JAVASCRIPT/HTML/CSS

A web app designed to track and organize time spent on tasks.

### LYREQ | PYTHON

A web scraper that creates an image depicting a song's lyrical repetitiveness (using Song Sim) for a given artist and song title.

### GITLET | JAVA

A lite version of Git version control, complete with the ability to commit, branch, checkout, and merge.
